# Flumevar

## Flumethrin

**99% Efficacy  
in Varroa control**

Varroa control without residues  
in honey. Without  
withdrawal period.

### READY-TO-USE PRODUCT

#### Easy application

Place 2 strips in the brood chamber  
One of them between frames 3 and 4;  
the other between frames 7 and 8

#### Dosage

Number of Frames covered by bees	<5	6-10	11-15	>16
Number of Strips	1	2	3	4

HEALTH | Synthetic external antiparasitic

**Product composition**

Each 100 g. strip contains:  
 Flumethrin ..... 0,3 %  
 Formulation agents Qs. .... 100 %

FLUMEVAR plastic strips, with ectoparasiticide action. Its formulation made of plastic polymers provides enough strength to continue within beehives for the time required to obtain an effective control. Likewise, Flumevar is ideal to use as a treatment in springtime due to lower amount of residues in beehive products.

**PHARMACEUTICAL FORM AND PRESENTATION CHARACTERISTICS OF PACKAGING, INVOLABILITY SYSTEM AND CONTENT**

This product is presented in PE strips inside dark envelopes preventing the passing of light, with thermo sealed seams. This system allows the product involability conditions and ensures optimum preservation until expiry date.

**Presentations**

**Weekly Cumulative Efficacy**

Results of different performance testing, conducted on field in different regions.
